1 Introduction

https://www.wolfram.com/language/elementary-introduction/

Definition 1.1 (Wolfram Langauge)**.** *Wolfram Language is a computation language.*

1.1 Functions

Definition 1.2 (function)**.**

```
(* Func[params] *)
(* [] for function, () for grouping *)

Plus[x, y, ...]
Times[x, y, ...]
Subtract[x, y] === x + (-1 * y)
Divide[x, y] === x * y^(-1)

Power[x, y, z] === Power[x, Power[y, z]]
x^y^z === x^(y^z)
(x^y)^z === x^(y*z)

Max[1, 2, ...]
Min[1, 2, ...]

RandomInteger[10]
```

1.2 Lists

Definition 1.3 (list)**.** *Collect things together.*

A Tools

- Palettes → Code Formatting
- `Information[expr, "Properties"]`
- directory

```
If[SameQ[$InputFileName, ""],
    If[$Notebooks,
        NotebookDirectory[]
        ,
        Directory[]
    ]
    ,
    DirectoryName[$InputFileName]
]
```
