1 Introduction

Definition 1.1 (English)**.**

2 Writing

3 Vocabulary

`https://dictionary.cambridge.org/`

3.1 adjective

- noun [ˈædʒ.ek.tɪv]

    1. a word that describes a noun or pronoun
        –

3.2 euphoric

- adjective [juːˈfɒr.ɪk]

    1. extremely happy and excited
        – a euphoric mood

3.3 epiphany

- noun [ɪˈpɪf.ᵊn.i]

    1. a moment when you suddenly feel that you understand, or suddenly become conscious of, something that is very important to you
        – Euphoric, mind-bending epiphanies may result!

3.4 execute

- verb [ˈek.sɪ.kjuːt]

    1. to do or perform something, especially in a planned way
        – execute instructions

3.5 mutation

- noun [mjuːˈteɪ.ʃən]

    1. the way in which genes change and produce permanent differences
        – No mutation! Everything (variables, data structure) is immutable.

3.6 imperative

- adjective [ɪmˈper.ə.tɪv]

    1. extremely important or urgent
    2. used for giving an instruction or order
        – an imperative or object-oriented paradigm

3.7 immense

- adjective [iˈmens]

    1. extremely large in size or degree
        – immense help

3.8 facetious

- adjective [fəˈsiː.ʃəs]

    1. not serious about a serious subject, in an attempt to be funny or to appear clever
        – “If it compiles, it must be correct” is mostly facetious.

3.9 mantra

- noun [ˈmæn.trə]

    1. a word or phrase that is often repeated and expresses a particular strong believe
        - "Don't Repeat Yourself" is a mantra often heard in the world of programming.

3.10 auxiliary

- adjective [ɔːgˈzɪl.i.ə.ri]

    1. giving help or support, especially to a more important person or thing
        - auxiliary boundary conditions

3.11 permutation

- noun [ˌpɜː.mjuːˈteɪ.ʃən]

    1. any of the various ways in which a set of things can be ordered
        - This sorting function returns a permutation of its input.

3.12 bureaucratic

- adjective [ˌbjʊə.rəˈkræt.ɪk]

    1. involving complicated rules and processes that make something slow and difficult
        - The program become long and bureaucratic.

3.13 conundrum

- noun [kəˈnʌn.drəm]

    1. a question that is a trick, often involving a humorous use of words that have two meanings
        - `Nat.zero` is a bit of a conumdrum.

3.14 polymorphism

- noun [ˌpɒl.iˈmɔː.fɪ.zəm]

    1. the fact that something such as an animal or organism can exist in different forms
        - The term polymorphism typically refers to datatypes and definitions that take types as arguments.

3.15 customary

- adjective [ˈkʌs.tə.mər.i]

    1. traditional
        - It is customary to use Greek letters to name type arguments in Lean.

3.16 reconcile

- verb [ˈrek.ən.saɪl]

    1. to find a way in which two situations or beliefs that are opposed to each other can agree and exist together
        - Programs are difficult to reconcile with the understanding of computation as the evaluation of mathematical expressions.

3.17 tedious

- adjective [ˈtiː.di.əs]

    1. boring
        - Most proofs are written for people to understand, and leave out many tedious details.

3.18 succinct

- adjective [səkˈsɪŋkt]

    1. said in a clear and short way; expressing what needs to be said without unnecessary words
        - A reference work in which all aspects of Lean are clearly specified, and demonstrated through succinct examples.

3.19 verbose

- adjective [vɜːˈbəʊs]

    1. using or containing more words than necessary
        - Use succinct expressions rather than more verbose equivalents.

3.20 trade-off

- noun [ˈtreɪd.ɒf]

    1. a situation in which you balance two opposing situation or qualities
        - trade-off between performance and flexibility

3.21 mnemonic

- adjective [nɪˈmɒn.ɪk]

    1. helping you to remember sth.
        - have mnemonic purpose

3.22 encapsulation

- noun [ɪnˌkæp.sjəˈleɪ.ʃᵊn]

    1. the process of showing the most important facts about sth.
        - data abstraction and encapsulation

3.23 synthesize

- noun [ˈsɪm.θə.saɪz]

    1. to put separate things together to form a single piece of work
        - synthesized default constructor

3.24 delegate

- verb [ˈdel.ɪ.geɪt]

    1. to give a particular job, duty, etc. to someone else so that they can do it for you
        - delegating constructor

3.25 cumbersome

- adjective [ˈkʌm.bə.səm]

  1. difficult to do or manage and taking a lot of time and effort
     - Reffering to library names with namespace:: prefix notation can be cumbersome.

3.26 hierarchy

- noun [ˈhaɪəraːki]

  1. a system that ideas or beliefs can be arranged into according to their importance
     - Class related by inheritance form a hierarchy.

3.27 congruence

- noun [ˈkɒŋgruəns]

  1. agreement with something; the state of being similar to something and not in conflict with it
     - `congrArg` can be used to replace the argument, `congrFun` can be used to replace the term that is being applied, and `congr` can be used to replace both at once.
